lawn again

HIGH QUALITY, DURABLE & AFFORDABLE ARTIFICIAL GRASS!

[www.perma-lawn.co.uk](http://www.perma-lawn.co.uk)

# Top class quality and great customer care

Based at our new headquarters in Alfreton, Derbyshire, PermaLawn is part of the "PermaGroup" and is Permaroof UK's specialist artificial grass division. No matter the size of your job, big or small, full rolls or cut to size, whatever you need, PermaLawn can provide for because our customer's satisfaction is always our number one goal. From our centralised location, virtually in the dead centre of the country, we are able to service the whole of the UK with our products, meaning no matter where you live, from the fields of Devon to the North Sea waters of Scotland, you'll receive top quality, durable artificial grass.

We work with only the best and most highly reputable manufacturers across Europe who have nearly two decades of experience producing only the very best artificial grass solutions. We strive to supply only the best with a brand range of artificial grass products that cater for all situations.

We have grasses ranging in pile height from our 26mm Shireoak (specifically designed to give a natural look for decorative use) to our 43mm Underwood (perfect for high traffic areas such as schools and exhibitions) all the way to the ultimate in luxury artificial grass, the plush and full bodied 37mm Birchwood.

If our already broad selection of artificial grasses aren't suited to your particular needs then simply contact us and one of the PermaLawn team will be on hand to help take you through over 50 other artificial grass options we have access to!

## 10kg Flexibond Adhesive

Flexibond Adhesive is a two component polyurethane based adhesive system specially designed for bonding short pile seed free or sand dressed carpet directly to a rubber shockpad or terracotta base.

## 10kg Multi-Purpose Adhesive

Multi-purpose adhesive is a twin component polyurethane based adhesive compound that is mainly used for bonding sand filled artificial grass to our seam joining tape which produces a strong and invisible joint along the seams of the two grass layers.

POPULAR

## Aquabond Adhesive

Aquabond Adhesive from PermaLawn is a single component moisture curing adhesive, of intermediate viscosity designed for bonding synthetic sports surfaces (such as artificial grass), to a variety of substrates or joining tapes.

## Joining Tape 200mm x Linear Meter

PermaLawn seam tape is a specially constructed tape for use with the recommended PermaLawn adhesive in forming strong bonds when joining artificial grass lanes. Regularly used in the landscaping of busy leisure areas.

RECOMMENDED

## Joining Tape 300mm x 100m

The wider 300mm tape allows for easier fitting and also boosts the anchorage of the artificial grass by covering a larger area making our 300mm joining tape essential in landscaping projects such as car and around busy leisure areas.

## Joining Tape 300mm x Linear Meter

PermaLawn's 300mm joining tape is a specially constructed tape for use with the recommended PermaLawn adhesive in forming strong bonds during the process of seam joining artificial grass lanes.

RECOMMENDED

## Half Green Pegs

Here at PermaLawn we offer half green pegs that are used to anchor your new artificial lawn to the surface. The half green spool and pins are designed to blend into the surface of the grass so there isn't a metallic tinge to the look.

RECOMMENDED

## Joining Tape 200mm x 100m

Our 200mm joining tape is supplied in a rolled form. This not only allows us to provide a more compact product that is easier to transport and store but to use and cut. You just simply unroll the tape and cut your desired length. *woof*

RECOMMENDED

## Weed Membrane 2m x 100m

Our heavy duty weed membrane is available in 2m wide and 100m long rolls. The latest weed control system, our membrane offers a 100% chemical free alternative to pesticides, making our product ideal for use in and around homes and commercial areas.

RECOMMENDED

## Weed Membrane 2m x Linear Meter

The perfect weed control system, our membrane offers a complete chemical free alternative to pesticides, making our product ideal for use in and around homes and commercial areas.

GREAT VALUE

## PermaTile Promenade Tile

Rubber Promenade Tiles are manufactured from recycled rubber granulate. Installation is made simple with the integrated corner pins meaning there is little or no need for adhesive.

## Stainless Steel Scissors

High quality, top tempered stainless steel blade pair alloy handled heavy duty scissors, perfect for cutting PermaLawn.

# Installation Guide

## What you need

1

Artificial Grass  
Adhesive

3

Carpet  
Knife

2

Seam  
Tape

4

Adhesive  
Comb
